

Topic: BACK PAIN

One of our patients was having a lot of pain, for years. They had been hit by a car as a teenager while crossing the street. The force threw their body a few feet and they hit the curb.

The didn't get broken bones then but was having degeneration of those bones, with multiple herniating and bulging discs from top to bottom. Pain and spasms have happened daily. She saw a wheelchair in her future. Sometimes, she needs help going to the bathroom. Nothing helped her until finding our doctor's office and doing our easy therapy program. She says it's a miracle.

She'd tried all types of therapy from acupuncture, chiropractors, injections, therapy, and even surgery. This easy movement saved her and can give relief immediately to anyone.

Can you write this in a better form and we can use it on my office's website landing page?

Customer request landing page.

Understands I'll provide editing/rewrite for the landing page but artwork is up to him.

TERRIBLE BACK PAIN

I suffered from **Severe Back Pain** for years until this one simple thing saved my life! Why hadn't someone told me before?

I was hit by a car, thrown through the air, landing back-first onto a curb at thirteen years of age. No broken bones but degeneration, herniating and bulging discs ran from my neck to my hips. Since then, pain and spasms have wrecked my body daily. A wheelchair was in my future. Sometimes, I needed help walking to the bathroom. Nothing worked. Until an Angel of Mercy gave me my life back with this easy miracle.

Trust me, I tried everything from acupuncture, chiropractors, injections, therapy, and even surgery. **This easy movement saved me.** The technique **can help you immediately.**
